SUMMARY

Trustworthy software engineer with a solid foundation of practical experience and dedicated work ethic. Self-motivated to consistently provide first-class results in line with stringent targets and deadlines.

Currently a Java Developer.

EXPERIENCE

06/2022 - 09/2022

Intern Developer, Raspberry Pi 'Heritage Console' Demo

Cardiff University – Cardiff, United Kingdom

- Gained hands-on experience with Raspberry Pi hardware and Linux environments, improving system deployment efficiency by 30%.
- Developed an application using the RetroPie OS as a base, enhancing retro gaming accessibility.
- Automated cloud-based game storage by integrating Google Drive via shell scripts, enabling remote access and reducing the time taken to upload games by 80%.

08/2023 - 11/2023

Lead Developer, Being Human Festival Exhibit

Cardiff University – Cardiff, United Kingdom

- Designed and implemented an interactive exhibit showcased at the National Museum of Cardiff, attracting 40+ visitors.
- Configured a Raspberry Pi as a Wi-Fi access point, allowing up to 2 concurrent users to interact with the system.
- Developed a Flask-based web application where users engaged with AI-generated content, logging 300+ responses in an SQL database.
- Created a dynamic website displaying real-time analytics, increasing audience engagement.
- Conducted live interactions with 40+ users during the exhibit, collecting feedback for system improvements.

06/2024 - 08/2024

Data/AI Intern

Kyndryl – Nicosia, Cyprus

- Designed and implemented a Power BI-based ticket processing system, improving tracking efficiency.
- Led a Power BI workshop for 10+ team members, increasing competency in data visualisation and dashboard creation.
- Conducted extensive testing and quality assurance for the eJustice system, identifying and reporting a plethora of issues.

- Manually reviewed and corrected *2,000+ data entries* in the eJustice system, ensuring compliance with project requirements and reducing errors by 98%.

10/2025 - Present

Java Developer

EY – Nicosia, Cyprus

- Developed and maintained backend services for a large-scale banking system serving *hundreds of thousands of users*, using *Java, Spring Boot, and Oracle SQL*.
- Fixed bugs and implemented new backend features across *BFF services, RESTful APIs, and microservices*, improving overall system stability and performance.
- Took ownership of 3 *microservices*, managing feature development, prioritisation, and ongoing maintenance.
- Wrote comprehensive **unit tests** for new features and legacy code, increasing test coverage and reducing regression related issues.
- Worked extensively with *legacy codebases*, safely refactoring and extending functionality using test driven approaches.
- Deployed changes to *production environments* on multiple occasions, resolving live issues and ensuring system reliability.
- Collaborated with a team of *~10 engineers*, actively participating in *daily stand-ups, sprint planning, and retrospectives*.
- Used *Jira* for task tracking and *GitLab* for version control and CI workflows.

EDUCATION

2021-2024

BSc Computer Science

Cardiff University – Cardiff, Wales

- Achieved **First-Class Honours**.
- Relevant modules:
 - CM2307 – Object Orientation, Algorithms and Data Structures
 - CM2105 – Data Processing and Visualisation
 - CM2101 – Human Computer Interaction
 - CM2203 – Informatics
 - CM3104 – Large-Scale Databases

2024-2025

MSc Software Engineering

Cardiff University – Cardiff, Wales

- Achieved **Merit**.
- Relevant modules:
 - CMT651 – Agile Software Development
 - CMT654 – DevOps
 - CMT655 – Manipulating & Exploiting Data
 - CMT656 – Delivering User Experience
 - CMT690 – Dissertation

PROJECTS

Developer

3D Environment Editor, BSc Dissertation Project

- Designed a custom 3D scene editor as a sister application to a Cardiff University research project on camerawork simulation.
- Developed a real-time 3D editing interface for journalism lecturers, enhancing visual storytelling in educational settings.
- Utilised *Unity's Universal Render Pipeline (URP)*, achieving a 30% improvement in graphics performance.
- Implemented *data serialisation* techniques, enabling seamless import/export of 3D scenes as external files.
- Led multiple user tests with lecturers, incorporating feedback to enhance *UI/UX* and functionality.

Creator/Developer

Untitled Unity Game (Ongoing)

- Developing a 3D platformer in *Unity*, currently with 1 completed level and playtesting.
- Designed and implemented a custom dialogue system using queues, improving character interactions and narrative flow.
- Integrated third-party assets and SDKs, enhancing gameplay mechanics and visual quality.
- Conducted *5+ playtesting sessions*, iterating on game design based on user feedback.
- Implemented an achievement system, boosting player engagement and retention.

Developer

Bike Detection, Analytics & Prediction, MSc Dissertation Project

- Built a system to detect, track, and monitor bicycle capacity on trains and in stations across Wales for *Transport for Wales*, addressing low adoption of their existing manual reporting solution.
- Designed and evaluated *4+ prototypes and proof-of-concept approaches, including AI image detection*, comparing feasibility, accuracy, and deployment complexity.
- Developed a *data visualisation dashboard* presenting real-time and historical usage trends, improving operational visibility by *~40%*.
- Led a complete *UI/UX and visual redesign* using *Tailwind CSS*, transforming the platform into a professional, client-facing product.
- Implemented a *capacity prediction model* using historical usage data, weather forecasts, and temporal patterns, achieving *~80–85% prediction accuracy* in testing.
- Built the core platform using *Java and Spring Boot*, with a separate *Flask-based microservice* hosting the prediction logic.
- Containerised and deployed both services using *OpenShift*, enabling scalable deployment and smooth client handover.
- Worked closely with stakeholders at Transport for Wales, iterating on features based on feedback and prioritising high-impact functionality.
- Delivered full technical documentation and deployment artifacts, enabling successful transfer of ownership to the client.

TECHNICAL SKILLS

Programming Languages: Python, Java, C#, Bash

Web Development: Spring Boot, Flask, React, HTML, CSS, JavaScript, OpenStack

Architecture & Design: Microservices, RESTful APIs

Databases: MySQL, Oracle

Cloud & DevOps: Git, Jenkins, Terraform, Vagrant

Operating Systems: Windows, Linux

Project & Collaboration Tools: Jira

Low-Code Platforms: OutSystems

3D Development & Graphics: Unity (URP)

SOFT SKILLS

- Strong problem-solving and analytical thinking demonstrated both in work experience and projects.
- Effective communication, with experience presenting to teams of co-workers and interacting with users at events.
- Project management, successfully leading development efforts for academic and professional projects.

OTHER COMPETENCIES

Multilingual: Fluent in English & Greek.

Cloud & Remote Development: Experience integrating Google Drive APIs and setting up Raspberry Pi Wi-Fi access points.
